

Xorel for High Traffic Corridors + Elevator Lobbies

Case Study

Location

Chicago, Illinois

Product & End Use

Xorel Tangle W7 for Wallcovering

The 11th floor elevator lobbies and corridors of the Merchandise Mart in Chicago were designed by Marquardt+ with the intentions to withstand high levels of traffic.

Hosting the Architect & Designer industry event Neocon, these Xorel elevator lobbies and corridors welcome over 60,000 attendees each spring.

“We selected Xorel for its durability, seaming capabilities, and soft metallic sheen appearance that can stand up to scrutiny up close or far away.”

Owner, Marquardt +

Marquardt's team used Xorel for this project, as well as many others, because “the Xorel line provides an extensive variety of textures, colors and patterns, with a highly consistent appearance, sophistication and durability.”

“Few products perform in all these areas like Xorel!”
